

Prescription Information

This treatment plan contains important information regarding the medication that was prescribed to you by your doctor. The following includes: ingredient information, side effects, dosing instructions, proper storage, and other information important for you to know before starting treatment.

What is this medication used for?

This treatment plan may help reduce the appearance of hyperpigmentation (dark spots) and fine lines, brighten the skin, increase water retention of skin cells, increase elasticity, and reduce skin inflammation when used regularly and as prescribed.

Prescription formula ingredients may include:

Tretinoin

Niacinamide

Lactic acid with Sodium Hyaluronate in a Prescription Dermatology Cream

Ingredient Descriptions:

Tretinoin is a derivative of vitamin A found to increase healthy cell turnover which helps reduce the appearance of fine lines and dark spots.

Niacinamide is vitamin B3 which may help brighten the complexion, reduce appearance of wrinkles, reduce water loss through the skin, improve elasticity, and fight inflammation.

Lactic acid is an organic acid which may help with fine lines and wrinkles by

increasing collagen production and preventing skin breakdown caused by UV exposure.

Hyaluronic acid is a natural component of skin and connective tissues which helps retain moisture and plump up skin cells.

What is the best way to use this medication?

Apply a thin layer of cream on the entire face avoiding the mouth and eye area, and rub in gently. Apply once daily at night-time or follow your doctor specific orders. Wash hands before and after application. Follow your doctor's specific orders if you are unsure how to use the medication.

What should I tell my doctor before starting this medication?

Tell your doctor of any medication or ingredient allergies or sensitivities that you may have. Tell your doctor if you are

allergic to any of the drugs in this formulation, as well as related drugs such as (tretinoin, vitamin A, retinol, niacinamide, lactic acid, sodium hyaluronate, hyaluronic acid). Tell your doctor if you are pregnant, trying to get pregnant, or breastfeeding.

Pregnancy & Breastfeeding

This compound has not been evaluated for use during pregnancy or breast feeding. If you are pregnant, breast feeding, or trying to become pregnant use this medication only at the discretion of your doctor.

What are the possible side effects of this medication?

Itching, redness, scaling and dryness may occur and can be managed with frequent use of an everyday moisturizer. You may also experience peeling, burning, stinging, or increased sensitivity to the sun. If side effects are severe, stop medication and contact us and your doctor or seek emergency medical treatment. Use sunscreen daily and wear protective clothing when outdoors. Tell your doctor right away if you get sunburned or have skin blisters/redness. Wait until your skin has completely recovered from a sunburn before using tretinoin.

How long until I see a desired effect from this medication?

It may take up to several weeks to see maximum results.

FAQ's

Please visit the Family Pharmacy website FAQ section or search the <https://www.familypharmacy.org/our-blog-2> for more informative articles and literature.

Allergies

This medication may cause an allergic reaction if you are allergic to the contained ingredients, or ones that are very similar. If you have an allergy to the contained chemicals listed or related chemicals, please reach out to us and contact your doctor. Get emergency medical help if you have signs of an allergic reaction such as: hives, difficulty breathing, swelling of your face, lips, tongue, or throat.

How should I store this medication?

If the product has arrived warm, wait 2 hours before using. Store this medication in a cool, dry environment, protected from light, at room temperature (68F-77F). Always make sure the container is tightly closed when not using the medication. Keep all medications in a safe place out of reach of pets and children.
